A Great Week For Reading!

Every week I compile a list of those albums most likely to cause the greatest commercial or critical stir, then prune that mighty list down to 10!

This week, however, after a lengthy examination, I could only find *three or four* albums that met those very high standards!

Additionally, I like to place the week's "biggest" album in the No. 1 slot--an influential gesture that may cause the sale of an additional 10,000-15,000 units per album, according to knowledgeable insiders!

But looking at the list below and attempting to put these releases in any kind of recognizable order, I have absolutely no idea which if *any* of these albums is bigger than any of the others!

Which must mean that they're *all* incredible!

Gary Moore: *The Definitive Montreux Collection* (DVD and CD) (Eagle Rock) An excellent showing for Irish guitarist Moore--a superstar in Europe and one not quite so well-known Stateside. This package includes two DVDs collecting live performances from the Montreux Jazz Festival circa 1990, 1995, 1997, 1991 and 2001, and an additional audio CD featuring 11 of the best from those sets. Moore's playing is always tasteful and in some ways as dynamic as that of his mentor, Fleetwood Mac's Peter Green; give a listen to "Still Got The Blues" here and be prepared to be immensely impressed. Excellent stuff.
