

ABC Rock Feed

January 2009

On March 3rd, a new DVD featuring stripped-down performances from some of modern rock's biggest names will arrive. Released in the UK in November, *From The Basement* compiles highlights of famed producer NIGEL GODRICH's concert series of the same name. There is no host, no audience and no big production -- the artists simply, quote, "go into the studio, set up and play their hearts out." And what a list of artists it is. The two-hour DVD includes performances from RADIOHEAD, BECK, THE WHITE STRIPES, SONIC YOUTH and many others.
